

Kanban Workflow Board – Task Visualization Report

Objective: Create a Kanban board with **To Do**, **In-Progress**, and **Done** columns, add sample tasks, and move tasks across columns to simulate workflow.

Board Summary

Columns Created:

- To Do
- In-Progress
- Done

Sample Tasks (5):

1. Collect project requirements
2. Design UI mockups
3. Develop login module
4. Test application
5. Prepare final report

Workflow Simulation:

- Initially, all tasks were created on the board.
- "Develop login module" was moved to **In-Progress** to represent active development.
- "Collect project requirements" and "Design UI mockups" were moved to **Done** after completion.
- "Test application" and "Prepare final report" remained in **To Do**, indicating pending work.

Conclusion:

The Kanban board provides a clear visual representation of task status, helping teams monitor progress, prioritize pending work, and improve workflow management.
