Screen 1: Home Screen

Screen 2: Available Buses

Screen 3: Seat Selection

Screen 4: Payment Details

Screen 5: Booking Confirmation

Workflow

The user searches for buses by entering the source, destination, and travel date. The application displays available buses, allows seat selection, shows a payment summary, processes payment, and finally generates a booking confirmation with ticket details.

Conclusion: This prototype demonstrates the complete booking process in a simple and user-friendly interface created using Figma.
