

# E-Commerce Mobile App Prototype – Stakeholder Review Report

**Objective:** Create an interactive Figma prototype for an E-Commerce mobile application to gather stakeholder feedback and approval on the user interface design.

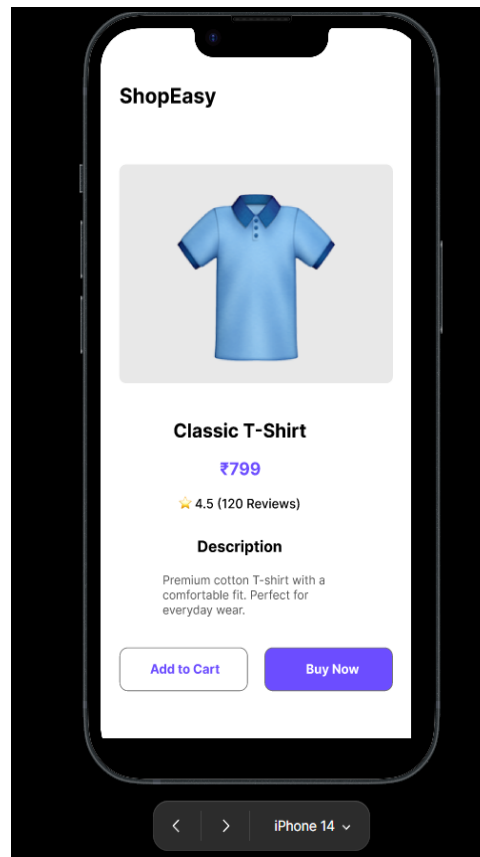

## Figma Prototype Link (Clickable):

## Screen 1: Home Page

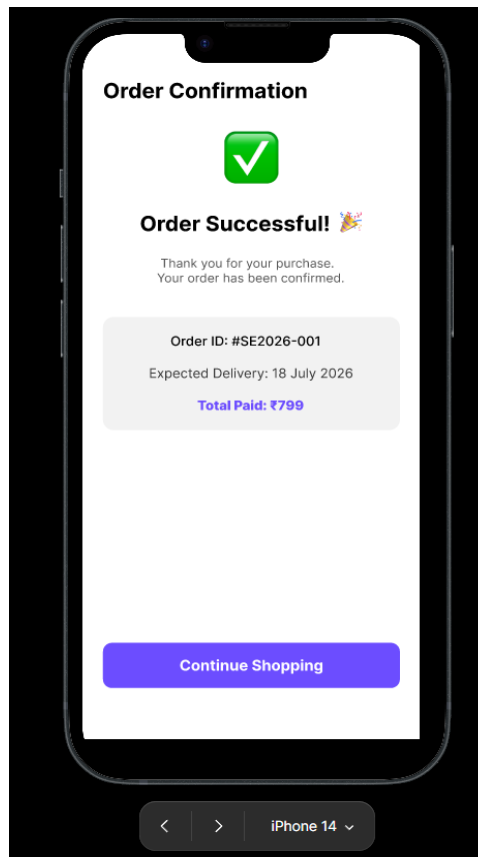

## Screen 2: Product Details

Screen 3: Payment Page

Screen 4: Order Confirmation

## Prototype Flow

1. Browse products from the home screen.
2. View product details including price, rating, and description.
3. Add the product to the cart or purchase it immediately.
4. Select a payment method and confirm the order.
5. Display the order confirmation with the order ID and delivery details.

## Purpose for Stakeholders

This prototype helps stakeholders evaluate the application's layout, navigation, product presentation, checkout experience, and overall usability before development begins. Feedback collected at this stage can be incorporated into the final UI design.
