

EXPERIMENT 11

JIRA–CONFLUENCE INTEGRATION FOR LIBRARY MANAGEMENT SYSTEM

Aim: To link Jira tasks with Confluence and create a project overview page for streamlined task tracking and progress monitoring of the Library Management System.

Procedure / Description

1. Create a new Confluence page titled **Library Management System Project Overview**.
2. Embed at least five Jira issues related to the Library Management System development.
3. Use the Jira macro to display the selected issues along with their current status such as To Do, In Progress, In Review, and Done.
4. Add a progress bar to visually represent the completion percentage of the sprint tasks.
5. Verify that the Confluence page clearly shows the linked Jira tasks and their progress for project monitoring.

Jira Tasks Used

- Develop Book Search Functionality – LM-1
- Create User Login Page – LM-2
- Implement Book Borrow Module – LM-3
- Fix Frontend Integration – LM-7
- Implement User Authentication – LM-8
- Integrate Email Notifications – LM-10
- Build Admin Dashboard – LM-12
- Implement Password Reset Feature – LM-14

Result

The Jira tasks were successfully linked with Confluence for the Library Management System. The project overview provides a clear view of task status and progress, making sprint tracking and project monitoring easier.
