

EXPERIMENT 13

TASK MANAGEMENT SYSTEM – MoSCoW AND KANO PRIORITIZATION IN JIRA

Aim: To prioritize the requirements of a Task Management System using the MoSCoW and Kano models in Jira.

Requirements

1. User Login and Role Assignment
2. Task Creation and Assignment
3. Task Prioritization and Deadlines
4. Progress Tracking and Reporting

MoSCoW Prioritization

Requirement	Priority	Reason
User Login and Role Assignment	Must Have	Essential for secure access and role-based permissions.
Task Creation and Assignment	Must Have	Core function required to create and allocate tasks.
Task Prioritization and Deadlines	Should Have	Important for organizing work and meeting deadlines.
Progress Tracking and Reporting	Could Have	Useful for monitoring work and generating reports; can be enhanced later.

Kano Model Prioritization

Requirement	Kano Category	Reason
User Login and Role Assignment	Must-Be	Users expect secure login and appropriate role access.
Task Creation and Assignment	Must-Be	Basic task creation and assignment are expected from the system.
Task Prioritization and Deadlines	Performance	Better prioritization and deadline management improve usefulness.
Progress Tracking and Reporting	Performance	Effective tracking and reporting improve visibility and satisfaction.

Jira Prioritization Procedure

1. Create the four requirements as Jira issues in the Task Management System project.
2. Assign the MoSCoW priority to each requirement using the configured Jira priority field, label, or custom field.
3. Add the Kano category using a Jira label or custom field.
4. Review the prioritized requirements in the Jira Active Sprint or Backlog view.
5. Use the Jira board to monitor the status of the prioritized work items.

Result

The Task Management System requirements were prioritized using both MoSCoW and Kano models. Jira provides a visual way to organize the requirements, monitor their status, and support effective sprint planning.
